AUSTRALIAN CAPITAL TERRITORY

9:00 PM – 1:30 PM AEDT

Location	Venue TBC, The Australian National University, ACT 2600
Delivery	Face-to-face
Conveners	Professor Sotiris Vardoulakis, HEAL Director, Australian National University Dr Stewart Sutherland, Australian National University Assistant Professor Ro McFarlane, University of Canberra Dr Peter Tait, Australian National University & Public Health Association of Australia (PHAA)
Session Description	This session will facilitate discussion of leading health, environmental and climate adaptation challenges that we face in the ACT, and across Australia. It will also enable researchers, policy makers and community actors to identify evidence gaps and shape solutions. The opening address will be followed by an open panel showcasing innovations in climate adaptation research, policy and practice. Focusing on adapting to the climate now and in the future of 2045, three breakout discussion groups will explore challenges and solutions: (1) Health service delivery and infrastructure; (2) Built environment and housing; and (3) Water and natural resources.

9:00 AM - 9:30 AM AEDT	<u>Arrival & Registration</u>
9:30 AM - 9:50 AM AEDT	<u>Welcome</u> Prof Sotiris Vardoulakis, Australian National University
	Acknowledgement of Country Agenda & Expectations

PLANETARY HEALTH EQUITY

3:15 PM – 4:45 PM AEDT

Delivery	Online
Conveners	Dr Megan Arthur, Planetary Health Equity Hothouse, School of Regulation and Global Governance, The Australian National University
Session Description	Planetary health equity – the equitable enjoyment of good health and a sustainable ecosystem – is in crisis. Addressing this demands ambitious and urgent action on the structural drivers of social inequity and climate change. These drivers come in the potent form of global consumptogenic systems. Yet, despite the unfolding catastrophe, little effective political and policy attention is given to transform the consumptogenic system and act in the interests of PHE. Arguably, nothing will change unless entrenched power inequities are addressed. Drawing on emerging work from the ARC Laureate Fellowship Planetary Health Equity Hothouse (PHEH) and specific case studies, this interdisciplinary panel will present new evidence for understanding and mitigating the global consumptogenic system in the 21st century.

3:15 PM - 3:20 PM AEDT	<u>Introduction</u> Dr Megan Arthur, Planetary Health Equity Hothouse, The Australian National University
3:20 PM - 4:20 PM AEDT	<u>Invited Talks</u>
